

TRICOR AXCELASIA

ENVIRONMENTAL, SOCIAL & GOVERNANCE ADVISORY

Stakeholders are paying more attention to how organizations are managing resources to achieve corporate results. With environment, social and governance (ESG) aspects becoming top priority, the framework, processes, procedures, reporting and annual report disclosure requirements for publicly listed organizations now include ESG, integrated and sustainability reporting.

Annual reports serve as a corporate assessment that not only presents a business's financial results, but also provides interested parties and stakeholders with valuable information on how the business operates and is managed. It is a useful way for an organization to present meaningful qualitative information to its shareholders and stakeholders.
