# GOVERNANCE, RISK & COMPLIANCE

Establishing a strong Corporate Governance (CG) structure and practice has become an important strategic move for many corporations. A solid CG structure, supported by a good governance mindset provides the foundation for long term organizational growth and business sustainability.

To be successful, organizations must excel at strategic planning and strategic execution. They must possess the discipline to execute action plans diligently and the adaptability to navigate complexities and uncertainties.

Risk management has become one of the critical strategic management tools for business leaders. A risk-minded leader is able to develop risk optimization strategies, supported by data and assumptions that reflect challenges ahead.
